

# Green Building Products Showcase

## Summary of products displayed

Building a new 1,500 square foot home will generate more than 3 tons of waste. In fact, nearly 20% of the solid waste disposed in Sonoma County's landfill comes from construction and demolition projects.

Green building encompasses many methods and materials; some new and high tech, others that rediscover ancient ways. It means better use of resources, less waste, reducing toxic chemical use and conservation of trees, energy and water.

The Green Building Products Showcase is sponsored by the Sonoma County Waste Management Agency with funding from the California Integrated Waste Management Board. For more information about green building, call the Sonoma County Eco-Desk at 565-DESK(3375) or visit [www.recyclenow.org](http://www.recyclenow.org)
